Programming Tools

NextJs, ReactJs, Remix, VueJs, Svelte,
Figma, Cypress, Jest, NodeJs, Git, Express,
Flask, NestJs, Fastify, MongoDB, Firebase,
PostgreSQL, Docker, Kafka

Major Languages

TypeScript, JavaScript
Python
Basic Knowledge of Java
Learning Rust

Skills

-  Frontend & Backend Development
-  Attention to detail
-  Logical Approach
-  Creative Ability
-  Teachable and ready for correction

Education

- **Rebase Academy**
October 2022 - October 2023
Cameroon-Yaounde
- **Mechanical Engineering**
National Polytechnic University
Institute Bamenda

Certifications

- **HackerRank JavaScript Specialist Certificate**
6 October 2023 [view cert](#)

Articles [See all articles on medium](#)

- [Configure Tailwind in Svelte](#)
- [My Journey Learning Svelte](#)
- [Getting started with Ipgeolocation](#)

Hobbies

- Basket ball
- Music
- Digging more JavaScript.

EXPERIENCE

2 + years coding experience

[Aftawallet](#)

Junior Frontend developer Intern (Fintech Startup)

September 2023- October 2023 | Kigali - Rwanda (remote)

- Consumed APIs, and managed an active admin dashboard
- Collaborated with a team of developers to build parts of the web interface, with UX at the back of our minds
- Worked and reported remotely

[Azen-Enterprise](#)

Full Stack developer (Freelance startup)

October 2023 - March 2024 | Buea - Cameroon (remote)

- Built and consumed Restful APIs on the frontend
- Built Apis for authentication, with TypeScript always at the core
- Collaborated (remotely) in building tools for users

[Rebase Academy](#)

Front End | JS Mentor (Full-Stack Web Dev BootCamp)

July 2023- September 2023 | Yaouonde - Cameroon

- Assisted newer developers in understanding some key concepts of JavaScript, from data types to how JS works
- Help debug code while learning and making them learn from their mistakes
- Primarily helped and assisted in their understanding of tools such as JS, HTML, CSS, extended to React

PERSONAL PROJECTS

R-Cloud

TypeScript, NextJs (AppRouter), Firebase(Auth, Storage, FireStore)

A Cloud Storage service, built for storing saving, downloading, and sharing files from a cloud. Designed with Figma and built as a PWA. It is the first app in my [r-apps](#) collection

R-APPS

TypeScript, NextJs (AppRouter)

A list of applications from and by me. As of now, they include **r-cloud**, **r-chat** (my real-time messaging application), **r-tm** (my task manager and collaboration application), and **r-auth** (my authentication provider, one which you can use to authenticate across all r-apps)

@orashus/http-client

TypeScript, npm

An npm package and a lightweight http-client built on top of the JavaScript Fetch API, to facilitate API calls, and better DX. It supports a few main HTTP verbs such as GET, POST, PUT, PATCH, DELETE.
